EXPERIENCE

Melbourne Hotel — Programmer, Front End Developer (Freelance)

November 2023 – December 2024

As a Programmer at Melbourne Hotel, I was responsible for designing and implementing visually engaging, user-friendly interfaces that aligned with the hotel's brand identity and high standards for customer experience. A key achievement during this role was developing an immersive 3D tour website, enabling potential guests to explore the hotel's facilities virtually. This project involved creating responsive, interactive front-end designs that seamlessly integrated 3D elements for a realistic user experience.

PROJECTS

Hydrix Water Station

Water Station Management System

A real-time system for managing water refilling stations, sales, transactions, inventory, and reports with an analytics dashboard. Includes AI-powered analytics, station and inventory management, salary and employee management, and real-time monitoring.

Technologies: Vue.js, Supabase, Tailwind CSS, TypeScript, PostgreSQL, Google Gemini

BudgetPOS

Point of Sale System

A modern, offline-first POS system for food and retail businesses with real-time sales tracking, inventory management, and employee scheduling. Features product and inventory management, customer profiles and order history, and printable receipts and invoices.

Technologies: Nuxt.js, MySQL, Tailwind CSS, TypeScript, Capacitor

Resume Builder

Online Resume Builder

An online resume builder with live preview, drag-and-drop sections, customizable templates, and seamless one-click PDF export.

Technologies: Nuxt.js, Tailwind CSS, TypeScript, pdfMake

TicTacToe Explosion

As an aspiring web developer, I created an enhanced version of tic-tac-toe with multiplayer support for up to four players. This version includes a touch of chain reaction mechanics, where certain moves can impact surrounding cells, adding a strategic twist. This project has been a valuable experience for me to apply my skills in interactive game design and web development.

SKILLS

JavaScript, TypeScript, HTML, CSS, React, Vue.js, Nuxt.js, Node.js, Express JS, Tailwind CSS, Sass, Pinia, Supabase, PostgreSQL, MySQL, SQL, Git / GitHub, REST API, Mobile Responsiveness

EDUCATION

Binangonan Catholic College

Bachelor of Science in Information Technology

Major in Web and Mobile Application Development • 2023 – Present
